

# Mobile Grandstands Factsheet

## Maximum Flexibility

Stage any event: Whether sport tournament, rock concert or shareholders' meeting. Choose any arrangement: Designed for the most demanding live entertainment events, our mobile, highly flexible grandstand system lets you set-up an auditorium for any event format in no time at all.

## Mobile telescoping grandstand system

- Consists of 12 units of 361 seats in 20 rows each for a total of 4,332 seats
- Upholstered wooden seats
- Seats and grandstand units in charcoal colour
- Rows and seats are numbered

## State-of-the-art modular design

The 12 units can be arranged individually or grouped together in any of our halls A1 to A4. This gives you flexible arrangement options:

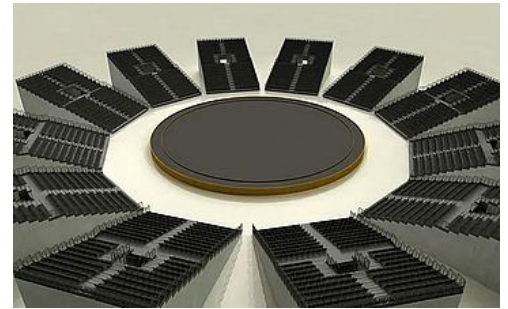

- Unidirectional arrangement (for concerts, congresses or conferences)
- Arena arrangement (for centre-stage concerts or sport events)
- Distributed set-up (for trade fairs or conferences)

For each of these options, additional seating can be provided in front of or next to the grandstand units.

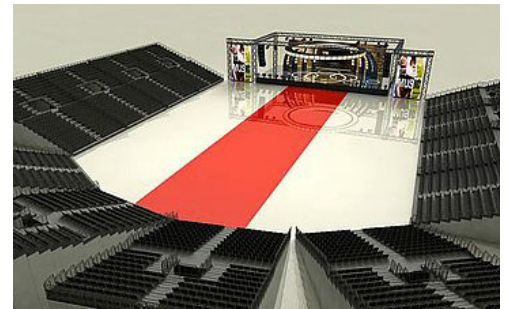

## Assembly and disassembly times

You have no time to waste. These modern, rolling grandstand modules can be set-up and removed in no time, reducing assembly and disassembly times to 20% or less of the time needed for similarly-sized conventional scaffold-type grandstands.

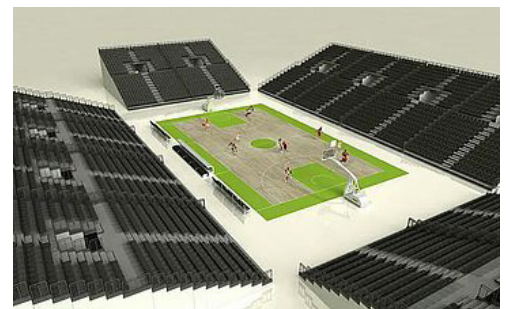

## Choose the perfect seating arrangement for your event
