Strong Partners, Strong Future: GET NORD Extends Collaboration with NFE and SHK Until 2030

Hamburg, 24 September 2025 – A clear signal for continuity, trust, and a shared vision for the future of the industry: GET NORD, Germany's leading trade fair for integrated building technology and a pioneer in connecting the electrical, sanitary, heating, and air conditioning sectors, is extending its successful collaboration with its conceptual sponsors NFE (Northern German Association for Electrical and Information Technology) and SHK Hamburg (Association for Sanitary, Heating and Plumbing Hamburg). The contracts with both associations have officially been extended through 2030.

With this step, the organizers of GET NORD secure the continued support of two key industry stakeholders for the upcoming editions of the trade fair in 2028 and 2030. The conceptual sponsors play a vital role in shaping the content and professional quality of the event, significantly contributing to GET NORD's positioning as the leading platform for integrated building technology in northern Germany.

"The extension of our partnership with NFE and SHK sends a strong message about the future of GET NORD," emphasizes Heiko M. Stutzinger, CEO of Hamburg Messe und Congress. "Together with our conceptual sponsors, we are shaping the trade fair as a driver of innovation and a central meeting point for craftspeople, industry professionals, and the trade sector."

"We are proud to continue walking this path together with GET NORD in the coming years," says Timm Göckens, Managing Director of NFE. "The energy transition, in which the electrical sector plays a key role, demands interconnected thinking and efficient collaboration across all trades. GET NORD showcases solutions for increasingly complex challenges and presents the full spectrum of forward-looking technologies."

"GET NORD is far more than just a trade fair," adds Andreas Albrecht, Managing Director of SHK Hamburg. "Especially in times of major challenges for the SHK sector, it serves as a central hub for professional exchange, the presentation of innovative solutions, and the strengthening of our craft. We are very pleased to continue this successful partnership and actively shape the future of building technology together."

GET NORD will remain a key meeting point for professionals from various sectors in the years to come – with a clear focus on interdisciplinary solutions, digitalization, and sustainable building technology, including renewable energies.

Über die GET NORD

Die GET NORD ist als gemeinsame Fachmesse für die technische Gebäudeausstattung bundesweit Vorreiterin bei der Vernetzung von Elektro, Sanitär, Heizung und Klima und die führende gebäudetechnische Fachmesse im Norden. Sie findet alle zwei Jahre auf dem Gelände der Hamburg Messe und Congress statt und vernetzt mit ihrem wegweisenden Messekonzept die verschiedenen Gewerke der Gebäudetechnik mit Architektinnen und Architekten, Planenden, dem Großhandel, dem Handwerk und der Industrie. Rund 650 Unternehmen präsentieren ihre neuesten Produkte und innovativen Lösungen zu den Themen Energieeffizienz, Erneuerbare Energien, Energiemanagement, Gebäudeausstattung und Gebäudesystemtechnik. Damit ist die GET NORD Plattform und Impulsgeber für zukunftsorientierte Gebäudetechnologien und Lösungen für den Klimaschutz zu Hause. Sie findet vom 19. bis 21. November 2026 in Hamburg statt.
